

DANIELSON AND PUTNAM NEWS

DANIELSON

Danielson has the promise of a larger, more modern and slightly hotel than it has heretofore possessed. William S. Brown, owner and operator of the At-lawagan hotel, said Tuesday morning that he has put six dwellings that he owns on Water street, on the market that he may obtain cash with which to enlarge and improve the hotel.

Mr. Brown plans an addition, at the rear, to contain 14 additional sleeping rooms, giving the house a total of upwards of 60. The house as it stands today will be remodeled and renovated at an expense for the entire improvement of approximately \$20,000 to \$25,000.

Building of the trunk line highway through Danielson from Providence to Hartford has unhappily Mr. Brown with the possibility of making a success of a larger and more modern hotel than he possesses at present.

It is generally accepted by persons familiar with conditions heretofore that the opening of the new trunk line, about October of this year, will mean a tremendous increase of motor traffic through this highway.

The new trunk line highway, now complete from Danielson to Hartford and the two last links between Danielson and Providence are now under construction—on the most used east and west main arteries of travel in this section of southern New England.

With these points in view, Mr. Brown is according to give Danielson a very good hotel—one that will appeal particularly to the motoring trade as well as to commercial travelers who do not use automobiles and the public at large.

The N. Y. N. H. and H. R. R. Company, afflicted with many tribulations, possibly can be excused for keeping its passenger station here locked and dark Sunday evening, but passengers who have had to wait outside for trains on cold Sunday nights during the present winter are inclined to be peevish about the matter.

Butter complaints have come to the ear of the news gatherer this week about what passengers suffered last Sunday night, when the boat station was late and a gale was howling out of the north.

PUTNAM

Appreciation was expressed here Tuesday of the restoration of through trolley service to Webster, a town that has been more or less difficult to reach by economical means of transportation for the past two years.

The train service between Putnam and Webster is now less frequent and satisfactory than formerly was the case, so the coming back of the trolley service is regarded as a decided convenience.

Traveling men are particularly appreciative of the return of the service and a number of this class of patrons of the road were using the cars on Tuesday, having quickly learned that it is possible once again to make the trip by trolley.

The police department has made it known that it will continue as frequently as the necessary information is obtained to warrant searches with the home of seizures.

Some A. T. and T. line crews that have been in this territory and territory heretofore since the great ice storm of November 24 tied things in knots are completing their work and are being transferred to other points. One crew that has worked here and at Webster was getting out of the territory on Tuesday. A truck carrying tools and equipment left Webster and came through this city en route to Hartford.

Checker players here continue to discuss the wizardry of the game of Victor Townsend who as one stunt of his visitation here managed easily to defeat simultaneously 15 of the best players that could be brought together from this city and some of the surrounding places. Playing four separate games against four opponents while blindfolded and standing apart from the tables, the moves of his opponents being called to him by numbers of positions on the board, he won the game and secured three draw games. The players from this vicinity who saw Mr. Townsend at work were delighted with the entertainment afforded them.
